The accompanying notes are an integral part of these condensed consolidated interim financial statements.

1. Nature of Operations

The Company was incorporated on October 27, 2010 under the Business Corporations Act (British Columbia) as Tasex Capital Limited ("Tasex"). On April 29, 2011 the Company filed its final prospectus and, on May 3, 2011, received final receipts for the prospectus and became a reporting issuer in British Columbia and Alberta. On June 8, 2011 the Company completed its initial public offering (the "Offering") and, on June 10, 2011, the Company's common shares began trading on the TSX Venture Exchange (the "TSXV") as a capital pool company. Effective February 22, 2012 the Company completed its Qualifying Transaction and acquired, all of the issued and outstanding common shares of Burke Resources Limited ("Burke"). Burke held 100% of Woxna Graphite AB ("Woxna") (formerly Kringelgruvan AB), a private Swedish company. Woxna has a 100% ownership interest of the Woxna Graphite Mine located in central Sweden. See also Note 4(a). The Company also changed its name from Tasex Capital Limited to Flinders Resources Limited in conjunction with the completion of the Qualifying Transaction. The Company's common shares now trade under the symbol "FDR". The Company's principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7.

The Company is a junior exploration company currently engaged in the development of the Woxna Graphite Mine. On the basis of information to date, it has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the resource interests is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain any additional funding that may be necessary to complete development and upon future profitable production. The amounts shown as exploration and evaluation assets represent net costs to date, less amounts recovered or written off, and do not necessarily represent present or future values.

As at January 31, 2013 the Company had working capital of $14,786,708, non-current liabilities of $4,311,482 and an accumulated deficit of $8,203,730. Based on current information the Company estimates that it has adequate funding in place to complete the development of the Woxna Graphite Mine. If, however, development cost estimates were to change the Company may require additional financing. The Company's ability to continue as a going concern may be dependent upon the ability of the Company to obtain necessary financing to develop its properties and to establish future profitable production. The Company's operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS"), and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended October 31, 2012, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's consolidated financial statements for the year ended October 31, 2012.

Basis of Presentation

The preparation of consolidated interim financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

7. Exploration and Evaluation Assets (continued)

The Company holds a 100% interest in the Woxna Graphite Mine, comprising four exploitation concessions, known as Kringel, Mattsmyra, Gropabo and Mansberg. The Woxna Graphite Mine is located in Ovanaker Municipality, Gavleborg County, central Sweden.

In 1993 Woxna entered into agreements under which:

(i) it acquired the Kringel concession for an initial payment of SEK 150,000 and a further amount of SEK 4,000,000 ("property acquisition obligation") is to be paid upon the commencement of production from the Kringel concession; and

(ii) it acquired the Mattsmyra, Gropabo and Mansberg concessions for an initial payment of SEK 32,500 and a further payment of SEK 1,000,000 on each of the three concessions is to be paid upon commencement of production from these concessions.

Payments of the additional considerations are to be made to a Swedish governmental agency and will be based on annual production, at a rate of SEK 20 per metric ton processed, and is payable only if profits are generated from the individual concessions.

The Company has recognized the SEK 4,000,000 additional consideration associated with the Kringel concession. An obligation is recognized when a legal obligation is established, a reasonable estimate can be made of the obligation, and is measured at the discounted value for expected future payments. The discounted value is then accreted to the estimated future value over the period of the payment obligation. As at January 31, 2013 the Company applied a discount rate of 17% to expected future payments and has made the assumption that the obligation will be discharged in 2016 through 2017.

A continuity of the property acquisition obligation for the Kringel concession is as follows:

	$
Balance at October 31, 2011	265,116
Accretion of discounted cash flows	45,069
Foreign exchange adjustment	(3,739)
Balance at October 31, 2012	306,446
Accretion of discounted cash flows	13,024
Foreign exchange adjustment	13,100
Balance at January 31, 2013	332,570

No production has commenced on the Mattsmyra, Gropabo and Mansberg concessions and the additional payments are considered to be contingent amounts and will only be recognized as obligations when production commences on these concessions.

8. Provision for Site Restoration

Although the ultimate amount of the decommissioning obligation for the Kringel concession is uncertain, the fair value of this obligation is based on information currently available, including closure plans and applicable regulations. Significant closure activities include land rehabilitation, demolition of buildings and mine facilities and other costs. The provision for site restoration may be subject to change based on management's current estimates, changes in remediation technology or changes to the applicable laws and regulations. The total undiscounted amount of estimated cash flows to settle the Company's risk adjusted estimated obligation is SEK 41,500,000 to be incurred over the next 26 years with the majority of the costs to be incurred between 2036 and 2037.

(Unaudited - Expressed in Canadian Dollars)

8. Provision for Site Restoration (cotninued)

The fair value of the decommissioning obligation was calculated using a discounted cash flow approach based on a risk free rate of 1.984% (October 31, 2012 - 1.531%) and an inflation factor of 0.0% (October 31, 2012 - 0.40%). Settlement of the obligation is expected to be funded from general corporate funds at the time of decommissioning. Changes to the decommissioning obligation were as follows:

	$
Balance at October 31, 2011	4,892,703
Accretion	50,493
Revision of estimates	(111,310)
Foreign exchange adjustment	(78,699)
Balance at October 31, 2012	4,753,187
Accretion	23,576
Revision of estimates	(993,722)
Foreign exchange adjustment	195,871
Balance at January 31, 2013	3,978,912

As at January 31, 2013 there are no property restoration obligations for the Mattsmyra, Gropabo and Mansberg concessions.

A reclamation deposit of $70,411 (SEK 500,000) has been paid to the Gavleborg County Administration Board and has been accounted for as a long term deposit. The reclamation deposit was placed as security for site restoration on the Kringel concession.

9. Share Capital

(a) *Authorized Share Capital*

As at January 31, 2013 the Company's authorized share capital consisted of an unlimited number of common shares without par value. All issued common shares are fully paid.

(b) *Reconciliation of Changes in Share Capital*

No equity financing were conducted by the Company during the three months ended January 31, 2013.

During the fiscal year ended October 31, 2012 the Company completed the following share issuances:

(i) concurrent with the completion of the Acquisition, on February 22, 2012 the Company completed a private placement of 10,400,000 units at a price of $0.50 per unit for gross proceeds of $5,200,000. Each unit consisted of one common share and one share purchase warrant. Each warrant entitles the holder to purchase an additional common share at a price of $0.75 per share on or before February 22, 2014. The Company had received $5,200,000 share subscription proceeds prior to the Effective Date.

The Company paid finders' fees consisting of $349,875 cash and the issuance of 699,750 finders' options, with each finders' option exercisable to purchase one common share of the Company and one warrant at a price of $0.50 per option on or before February 22, 2014. Each warrant issued on the exercise of a finders' option will be exercisable to purchase an additional common share at a price of $0.75 per share on or before February 22, 2014. The $216,923 fair value assigned to the finders' options has been estimated using the Black-Scholes option pricing model. The assumptions used were: a risk-free interest rate of 1.13%; expected volatility of 125%; an expected life of two years; a dividend yield of 0%; and an expected forfeiture rate of 0%. The finders' options remained outstanding at January 31, 2013.

(Unaudited - Expressed in Canadian Dollars)

9. Share Capital (continued)

The Company incurred $22,741 for legal and filing fees associated with this private placement.

A director of the Company acquired 41,600 common shares of this private placement; and

(ii) on April 17, 2012 the Company completed a private placement of 8,823,530 units at a price of $1.70 per unit for gross proceeds of $15,000,001. Each unit consisted of one common share and one-half share purchase warrant. Each whole warrant entitles the holder to purchase an additional common share at a price of $2.20 per share on or before April 17, 2014.

The Company paid finders' fees consisting of $871,284 cash and the issuance of 512,521 finders' warrants. Each finders' warrant entitles the holder to purchase one common share of the Company at a price of $1.70 per share on or before April 17, 2014. The $891,787 fair value assigned to the finders' warrants has been estimated using the Black-Scholes option pricing model. The assumptions used were: a risk-free interest rate of 1.13%; expected volatility of 125%; an expected life of two years; a dividend yield of 0%; and an expected forfeiture rate of 0%.

The Company incurred $202,818 for legal and filing fees and other related costs associated with this private placement.

(c) *Warrants*

A summary of the number of common shares reserved pursuant to the Company's outstanding warrants at January 31, 2013 and 2012 and the changes for the three months ended on those dates is as follows:

	2013		2012	
	Number	Weighted Average Exercise Price $	Number	Weighted Average Exercise Price $
Balance beginning of period	14,841,487	1.21	257,200	0.30
Exercised	(10,000)	0.75	-	-
Balance end of period	14,831,487	1.21	257,200	0.30

The following table summarizes information about the number of common shares reserved pursuant to the Company's warrants outstanding and exercisable at January 31, 2013:

Number	Exercise Price $	Expiry Date
257,200	0.30	September 12, 2013
9,650,000	0.75	February 22, 2014

512,521	1.70	April 17, 2014
14,831,487		

(d) *Share Option Plan*

The Company has established a rolling share option plan (the "Plan"), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the options is set at the Company's closing share price on the day before the grant date, less allowable discounts. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of up to five years.

(Unaudited - Expressed in Canadian Dollars)

9. Share Capital (continued)

During the three months ended January 31, 2013 and 2012 the Company did not grant any share options.

During the three months ended January 31, 2013 the Company recorded a compensation recovery of $6,140 (2012 - $nil) on the adjustment to previously recognized amounts to the vesting of share options granted.

The fair value of share options vested during the three months ended January 31, 2013 is estimated using the Black-Scholes option pricing model using the following assumptions:

	2013
Risk-free interest rate	1.16%
Estimated volatility	154%
Expected life	2.25 years
Expected dividend yield	0%
Estimated forfeiture rate	0%

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measure of the fair value of the Company's share options.

A summary of the Company's share options at January 31, 2013 and 2012 and the changes for the three months ended on those dates is as follows:

	2012		2011	
	Number of Options Outstanding	Weighted Average Exercise Price $	Number of Options Outstanding	Weighted Average Exercise Price $

9. Share Capital (continued)

(f) *Shares Held in Escrow*

As at January 31, 2013 there were 8,250,778 common shares which remained held in escrow and will be released in accordance with the requirements of the TSXV.

10. Related Party Disclosures

A number of key management personnel, or their related parties, hold positions in other entities that result in them having control or significant influence over the financial or operating policies of those entities. Certain of these entities transacted with the Company during the reporting period.

(a) *Transactions with Key Management Personnel*

During the three months ended January 31, 2013 and 2012 the following amounts were incurred with respect to the Company's President and Chief Financial Officer ("CFO"):

	2013 $	2012 $
Management fees	40,500	37,000

As at January 31, 2013, $13,500 (2012 - $nil) remained unpaid and has been included in accounts payable and accrued liabilities.

The Company has a management agreement with the President which provides that in the event the President's services are terminated without cause or upon a change of control of the Company, a termination payment of two years of compensation, at $13,500 per month, is payable. If the termination had incurred on January 31, 2013, the amount payable under the agreement would be $324,000.

(b) *Transactions with other Related Parties*

During the three months ended January 31, 2013 and 2012 the following amounts were incurred with respect to other officers and directors of the Company:

	2013 $	2012 $
Health benefits	550	-

In addition, during the three months ended January 31, 2013 the Company incurred $8,500 (2012 - $nil) to Chase Management Ltd. ("Chase"), a private corporation owned by the CFO of the Company, for accounting and administrative services provided by Chase personnel, exclusive of the CFO, and for rent.

As at January 31, 2013, $7,500 (2012 - $nil) remained unpaid and has been included in accounts payable and accrued liabilities.

(c) During the three months ended January 31, 2013 the Company incurred $216 (2012 - $nil) for shared administration costs with public companies with common directors and officers.

As at January 31, 2013, $2,216 (2012 - $nil) remained unpaid and has been included in accounts payable and accrued liabilities.

See also Note 9(b)(i).

11. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following four categories: fair value through profit or loss ("FVTPL"); held-to-maturity investments; loans and receivables; and available-for-sale. The carrying values of the Company's financial instruments are classified into the following categories:

Financial Instrument	Category	January 31, 2013 $	October 31, 2012 $
Cash	FVTPL	15,163,256	16,863,409
Amounts receivable	Loans and receivables	196,826	209,882
Reclamation deposit	Loans and receivables	78,358	70,411
Accounts payable and accrued liabilities	Other liabilities	(734,963)	(602,423)
Property acquisition obligation	Other liabilities	(332,570)	(306,446)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for cash, amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The recorded amount for the property acquisition obligation approximates its fair value. The fair value is determined using a discounted cash flow approach based on the use of directly and indirectly observable inputs on reporting dates. A market rate of interest of 17% and payment dates of 2016 and 2017 were the assumptions. The Company's fair value of cash under the fair value hierarchy is measured using Level 1.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, reclamation deposit and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash, amounts receivable and reclamation deposit is remote.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. The following table is based on the contractual maturity dates of financial assets and liabilities and the earliest date on which the Company can be required to settle financial liabilities.

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bear floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

Foreign Currency Risk

The Company's functional currency is the Canadian dollar and major transactions are transacted in Canadian Dollars and SEK. The Company maintains SEK bank accounts in Sweden to support the cash needs of its foreign operations. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At January 31, 2013, 1 Canadian Dollar was equal to SEK 6.38.

Balances are as follows:

	SEK	CDN $ Equivalent
Cash	2,052,674	321,736
Amounts receivable	1,003,939	157,357
Reclamation deposit	500,000	78,358
Accounts payable and accrued liabilities	(3,889,497)	(609,639)
Property acquisition obligation	(2,122,121)	(332,570)
	(2,455,005)	(384,758)

Based on the net exposures as of January 31, 2013 and assuming that all other variables remain constant, a 10% fluctuation the Canadian Dollar against the SEK would result in the Company's net loss being approximately $35,000 higher (or lower).

11. Financial Instruments and Risk Management (continued)

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

12. Supplemental Cash Flow Information
