## 1. Nature of Operations

The Company is a junior exploration company currently engaged in the development of its 100% owned Woxna Graphite Mine located in central Sweden. During fiscal 2014 technical feasibility and commercial viability of the extraction of mineral resources at the Woxna Graphite Mine was demonstrated, transitioning the Company to the development stage of mining. Upon the transition, an impairment test was performed on the exploration and evaluation assets attributed to the mine prior to reclassification to property, plant and equipment and no impairment was assessed.

As at July 31, 2015 the Company had not achieved commercial production, as determined in accordance with accepted accounting practice. Effective August 1, 2015 the Company has determined that the commissioning of the Woxna Graphite Mine was complete. See also Note 4.

The Company has completed its current plan for the refurbishment and reactivation of the Woxna Graphite Mine and has developed a staged implementation plan for the commencement of operations. The staged plan spreads the capital costs over several years as sales contracts are established and permits lower production levels and costs until sales warrant capacity expansion. The Company has sufficient funding to implement the staged plan and meet anticipated levels of corporate administration and overheads for the ensuing twelve months. The underlying value of the resource interests is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain any additional funding that may be necessary to complete development and upon future profitable production. The Company's ability to continue as a going concern may be dependent upon the ability of the Company to obtain necessary financing to further develop its properties and to establish future profitable production. While the Company has been successful in securing financings in the past, there can be no assurance that it will be able to do so in the future.

The Company's common shares trade on the TSX Venture Exchange (the "TSXV") under the symbol "FDR". The Company's principal office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia, V6E 3V7.

## 2. Basis of Preparation

***Statement of Compliance***

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards ("IFRS"), and in accordance with International Accounting Standards ("IAS") 34, Interim Financial Reporting, as issued by the International Accounting Standards Board ("IASB"). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended October 31, 2014, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company's consolidated financial statements for the year ended October 31, 2014.

***Basis of Measurement***

The Company's condensed consolidated interim financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. The condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise noted.

***Basis of Presentation***

The preparation of consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

In February 2012 the Company completed the acquisition of Flinders Holdings Limited, which owns Woxna Graphite AB (“Woxna”). Woxna holds a 100% interest in the Woxna Graphite Mine, comprising four exploitation concessions, known as Kringelgruven, Mattsmyra, Gropabo and Mansberg. The Woxna Graphite Mine is located in Ovanaker Municipality, Gavleborg County, central Sweden.

In 1993 Woxna entered into agreements under which it acquired:

(i) the Kringelgruven concession for an initial payment of SEK 150,000 and a further amount of SEK 4,000,000 (the “property acquisition obligation”) is to be paid upon the commencement of production from the Kringelgruven concession; and

(ii) the Mattsmyra, Gropabo and Mansberg concessions for an initial payment of SEK 32,500 and a further payment of SEK 1,000,000 on each of the three concessions is to be paid upon commencement of production from these concessions.

Payments of the additional considerations are to be made to a Swedish governmental agency and will be based on annual production, at a rate of SEK 20 per metric ton processed, and is payable only if profits are generated from the individual concessions.

*(Unaudited - Expressed in Canadian Dollars)*

**3. Exploration and Evaluation Assets** (continued)

The Company has recognized the SEK 4,000,000 additional consideration associated with the Kringelgruven concession. An obligation is recognized when a legal obligation is established, a reasonable estimate can be made of the obligation, and is measured at the discounted value for expected future payments. The discounted value is then accreted to the estimated future value over the period of the payment obligation. As at July 31, 2015 the Company applied a discount rate of 17% to expected future payments and has made the assumption that the obligation will be discharged in 2016 through 2017.

A continuity of the property acquisition obligation for the Kringelgruven concession is as follows:

| | $ |
|---|---|
| **Balance at October 31, 2013** | 386,692 |
| Accretion of discounted cash flows | 71,543 |

| Accretion of discounted cash flows | 56,715 |
| Foreign exchange adjustment | (1,801) |
| **Balance at July 31, 2015** | 488,228 |

As at July 31, 2015 no exploration costs have been attributed to the Mattsmyra, Gropabo and Mansberg concessions.

No production has commenced on the Mattsmyra, Gropabo and Mansberg concessions and the additional payments are considered to be contingent amounts and will only be recognized as obligations when production commences on these concessions.

During fiscal 2014 technical feasibility and commercial viability of the extraction of mineral resources at the Woxna Graphite Mine was demonstrated, transitioning the Company to the development stage of mining. Upon the transition, costs on the exploration and evaluation assets attributed to the mine were reclassificated to property, plant and equipment.

Graphite sales and cost of sales during the commissioning stage of the Woxna Graphite Mine was recorded as pre-production costs, net of revenues. Effective August 1, 2015 the Company has determined that the commissioning stage was complete and that all future revenues and costs be recorded in the statement of profit or loss.

**5. Provision for Site Restoration**

Although the ultimate amount of the decommissioning obligation for the Kringelgruven concession is uncertain, the fair value of this obligation is based on information currently available, including closure plans and applicable regulations. Significant closure activities include land rehabilitation, demolition of buildings and mine facilities and other costs. The provision for site restoration may be subject to change based on management's current estimates, changes in remediation technology or changes to the applicable laws and regulations. The total undiscounted amount of estimated cash flows to settle the Company's risk adjusted estimated obligation is SEK 41,500,000 to be incurred over the next 22 years with the majority of the costs to be incurred between 2036 and 2037.

The fair value of the decommissioning obligation was calculated using a discounted cash flow approach based on a risk free rate of 0.82% (October 31, 2014 - 1.20%) and an inflation factor of negative 0.10% (October 31, 2014 - 0.10%). Settlement of the obligation is expected to be funded from general corporate funds at the time of decommissioning. Changes to the decommissioning obligation were as follows:

| | $ |

As at July 31, 2015 the Mattsmyra, Gropabo and Mansberg concessions remain undeveloped and there are no property restoration obligations relating to these concessions.

6. **Share Capital**

(d) *Share Option Plan*

The Company has established a rolling share option plan (the "Plan"), in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the options is set at the Company's closing share price on the day before the grant date, less allowable discounts. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of up to five years.

During the nine months ended July 31, 2015 the Company did not grant any share options. During the nine months ended July 31, 2014 the Company granted 805,000 share options and recorded compensation expense of $313,942.

**6. Share Capital** (continued)

The fair value of share options granted and vested during the nine months ended July 31, 2015 and 2014 is estimated using the Black-Scholes option pricing model using the following assumptions:

| | 2015 | 2014 |
|---|---|---|
| Risk-free interest rate | 1.28% | 1.01% - 1.28% |
| Estimated volatility | 121% | 72% - 121% |
| Expected life | 2 years | 2 years - 3 years |
| Expected dividend yield | 0% | 0% |
| Estimated forfeiture rate | 0% | 0% |

The weighted average fair value of all share options granted and vested during the nine months ended July 31, 2015 was $0.17 (2014 - $0.46) per share option.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide reliable measure of the fair value of the Company's share options.

A summary of the Company's share options at July 31, 2015 and 2014 and the changes for the nine months ended on those dates is as follows:

| | 2015 | | 2014 | |
|---|---|---|---|---|
| | Number of Options Outstanding | Weighted Average Exercise Price $ | Number of Options Outstanding | Weighted Average Exercise Price $ |
| Balance beginning of period | 2,390,000 | 0.59 | 2,927,500 | 0.62 |
| Granted | - | - | 805,000 | 0.51 |
| Exercised | - | - | (162,500) | 0.49 |
| Expired | (290,000) | 0.50 | (800,000) | 0.69 |
| Balance end of period | 2,100,000 | 0.60 | 2,770,000 | 0.57 |

The following table summarizes information about the share options outstanding and exercisable at July 31, 2015:

## 8. Financial Instruments and Risk Management

***Categories of Financial Assets and Financial Liabilities***

Financial instruments are classified into one of the following five categories: fair value through profit or loss ("FVTPL"); held-to-maturity investments; loans and receivables; available-for-sale and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

| **Financial Instrument** | **Category** | **July 31, 2015 $** | **October 31, 2014 $** |
|---|---|---|---|
| Cash | FVTPL | 3,657,824 | 6,506,217 |
| Amounts receivable | Loans and receivables | - | 254 |
| Reclamation deposit | Loans and receivables | 80,475 | 80,925 |
| Accounts payable and accrued liabilities | Other financial liabilities | (238,543) | (583,817) |
| Property acquisition obligation | Other financial liabilities | (488,228) | (433,314) |

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The recorded amount for the property acquisition obligation approximates its fair value. The fair value is determined using a discounted cash flow approach based on the use of directly and indirectly observable inputs on reporting dates. A market rate of interest of 17% and payment dates of 2016 and 2017 were the assumptions. The Company's fair value of cash under the fair value hierarchy is measured using Level 1.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit Risk*

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, reclamation deposit and amounts receivable. Management believes that the credit risk concentration with respect to financial instruments included in cash, amounts receivable and reclamation deposit is remote.

*Liquidity Risk*

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. The following table is based on the contractual maturity dates of financial assets and liabilities and the earliest date on which the Company can be required to settle financial liabilities.

**8. Financial Instruments and Risk Management** (continued)

| | Contractual Maturity Analysis at July 31, 2015 | | | | |
|---|---|---|---|---|---|
| | Carrying Amount $ | Contractual Cash Flows $ | Less than 3 Months $ | 1 - 5 Years $ | Over 5 Years $ |
| Cash | 3,657,824 | 3,657,824 | 3,657,824 | - | - |

| | Contractual Maturity Analysis at October 31, 2014 | | | | |
|---|---|---|---|---|---|
| | Carrying Amount $ | Contractual Cash Flows $ | Less than 3 Months $ | 1 - 5 Years $ | Over 5 Years $ |
| Cash | 6,506,217 | 6,506,217 | 6,506,217 | - | - |

| Accounts payable and accrued liabilities | (583,817) | (583,817) | (583,817) | - | - |
| Property acquisition obligation | (433,314) | (610,324) | - | (610,324) | - |

*Market Risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

*Interest Rate Risk*

The Company is exposed to interest rate risk to the extent that the cash bear floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

*Foreign Currency Risk*

The Company's functional currency is the Canadian Dollar and major transactions are transacted in Canadian Dollars and SEK. The Company maintains SEK bank accounts in Sweden to support the cash needs of its foreign operations. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At July 31, 2015, 1 Canadian Dollar was equal to SEK 6.59.

Balances are as follows:

| | SEK | CDN $ Equivalent |
|---|---|---|
| Cash | 1,662,625 | 252,295 |
| VAT receivable | 197,489 | 29,968 |
| Inventories | 548,971 | 83,299 |
| Plant stores and supplies | 618,661 | 93,874 |
| Reclamation deposit | 530,357 | 80,475 |
| Accounts payable and accrued liabilities | (1,166,621) | (177,029) |
| Property acquisition obligation | (3,217,591) | (488,228) |
| | (826,109) | (125,346) |

Based on the net exposures as of July 31, 2015 and assuming that all other variables remain constant, a 10% fluctuation the Canadian Dollar against the SEK would result in the Company's net loss being approximately $11,000 higher (or lower).

## 8. Financial Instruments and Risk Management (continued)

The Company also maintains a US Dollar bank account to facilitate the transfer of funds and payment of US Dollar denominated accounts payable. As at May 31, 2015 the balance of US Dollars held by the Company was insignificant.

*Capital Management*

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
